

A slide operator is used when there is limited space behind the secured facility, so the gate runs parallel to the fence or wall. Our Slide Gate Openers range from light to heavy-duty depending on the size of the entrance and quantity of open/close cycles. All the features and benefits are identical so selecting the operator is simple.

An automated vehicular gate system includes several components, all of which must be selected in concert with each other and with the requirements of the job.

RSL12V
Residential / Light Commercial Slide Gate Operator

Residential and light commercial DC powered slide gate access system with built-in battery back-up

MEGA SLIDE
Residential / Medium-Duty DC Slide Gate Operator

Designed with a 24V DC (1/2 HP equivalent) motor, this model provides exceptional starting torque and continuous operation, making it ideal for most applications.

MEGA SLIDE-X
Commercial DC Slide Gate Operator

Designed with a 24V DC (1/2 HP equivalent) motor, this model provides exceptional starting torque and continuous operation, making it ideal for most applications.

SL3000UL
Commercial Slide Gate Operator

The SL3000UL™ models of slide gate operators are the first choice for heavy-traffic applications and high-demand customers, including large development and management companies, prestigious residential gated communities, and custom home builders.

SL930
Heavy-Duty DC Commercial Slide Gate Operator

This powerful DC system has the starting torque equivalent to that of a 2 1/4 HP AC motor. It features soft start/soft stop operation for mechanical parts protection.

VSL595
Variable Speed Heavy-Duty Slide Gate Operator

The VSL595 is designed for high security applications such as airports, manufacturing plants or other areas where securing an opening quickly is important. It is capable of opening gates at speeds up to 2.2 feet per second.

SL595
Heavy-Duty Industrial Slide Gate Operator

The LiftMaster® SL595 is an extreme heavy-duty operator for industrial locations such as manufacturing plants and truck depots. The extremely powerful design supports gate lengths up to 90 feet and gate weights up to 2,500 pounds.

SL585
Industrial Slide Gate Operator

The LiftMaster® SL585 is a durable heavy-duty gear-driven operator for use on heavy gates and high-cycle applications such as gated communities and industrial locations.
