

A swing operator is used when a gate (or two gates) open inward or outward away from the wall. Our Swing Gate Operators range from light to heavy-duty depending on the size of the entrance and quantity of open/close cycles. All the features and benefits are identical so selecting the operator is simple.

RSW12V
Residential / Light Commercial Swing Gate Operator

Residential and light commercial DC powered swing gate access system with built-in battery backup

LA400
Residential DC Linear Gate Operator

The LA400 has a powerful 24VDC motor, which provides exceptional starting torque and features soft start/stop operation. This promotes longer gate and operator life, as well as dependable performance.

LA412
Solar Powered Residential Gate Operator

The LA412 is a solar powered residential swing gate operator with EverCharge® Power Management System. It also features soft start/stop operation, promoting longer gate and operator life, as well as dependable performance.

LA100
DC Powered Residential Swing Gate Operator

The LA100 is a DC-powered gate operator designed for residential single gate applications. It has a powerful 24VDC motor featuring soft start/soft stop operation, promoting longer gate and operator life.

Miracle-One™
24V DC Residential Linear Gate Operator

The Miracle-One™ is a DC-powered swing gate operator designed to deliver smooth, ultra-quiet performance. With state-of-the-art features like a battery backup, anti-theft alarm system, variable speeds and optional solar panels, this gate operator makes security smart.

CSW200UL
Commercial Swing Gate Operator

The CSW200UL models of swing gate operators are the first choice for heavy-traffic applications such as large gated communities, residential developments, commercial complexes, and private estates.

SW425
Residential DC Swing Gate Operator

This DC-powered system features soft start/soft stop operation for mechanical parts protection via a prewired, solid state control system.

MEGA SWING
Commercial DC Swing Gate Operator

The Mega Swing is a DC-powered addition to the LiftMaster® family of gate operators. Designed with a 24V DC (1/2 HP equivalent) motor, this model provides exceptional starting torque and continuous operation, making it ideal for most applications.

SW490
Industrial Swing Gate
Operator

The LiftMaster® SW490 offers powerful performance for high cycle and heavy industrial swing gate applications. This hefty design supports gate lengths up to 22 feet and gate weights up to 1,000 pounds.

SW470
Commercial Swing Gate
Operator

The LiftMaster® SW470 is a heavy-duty commercial swing gate operator for use in high-cycle applications such as gated communities and commercial access.

SW420
Residential Swing Gate
Operator

A reliable gear-driven swing gate operator for residential applications, the LiftMaster® SW420 offers a compact design that supports gate lengths up to 12 feet and gate weights up to 300 pounds.
